PROJECT TITLE

SDG 6 - HydroBuddy

NAME

Nabiha Binti Mohd Daud (A214179)

Project 1 : SDG Mobile Application - SDG6 HydroBuddy

Part 1

Problem Statement

Access to clean water is essential for daily life, yet many individuals are not aware of their actual water consumption and often fail to maintain proper hydration habits. In Malaysia, especially among students and busy individuals, there is a lack of simple digital tools that encourage awareness and monitoring of daily water intake. This can lead to inefficient water usage habits and poor awareness of water sustainability at a personal level. Therefore, there is a need for a simple and user-friendly application that helps users track and become more conscious of their daily water consumption in line with SDG 6: Clean Water and Sanitation.

Objective

- To develop a mobile application that allows users to record and track their daily water intake easily.
- To provide a personalized daily water intake target based on user profile information such as weight.
- To encourage consistent tracking habits through a user-friendly and engaging mobile experience.
